Claims 1-19 are pending in this application.

## **DETAILED ACTION**

### ***Election/Restriction***

Claims 1-19 are drawn to more than one inventive concept (as defined by PCT Rule 13) and, accordingly, a restriction is required according to the provision of PCT Rule 13.2.

PCT Rule 13.1 states that the international application shall relate to one invention only or to a group of inventions so linked as to form a single general inventive concept (requirement of unity of invention).

PCT Rule 13.2 states that unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features.

Annex B, Part 1(b), provides that "special technical features" mean those technical features which, as a whole, define a contribution over the prior art (novelty/unobviousness).

I. Claims 1-15, 17, drawn to example 1, classifiable in several non-heterocyclic classes (558, 562, etc.), numerous subclasses.

II. Claims 1-15, 17, drawn to example 2, classifiable in several non-heterocyclic classes (558, 562, etc.), numerous subclasses.

III. Claims 1-15, 17, drawn to examples 3-14, classifiable in several non-heterocyclic classes (558, 562, etc.), numerous subclasses.

IV. Claims 1-15, 17, drawn to none of the examples above but other species of the compounds within the scope of the claims. The species must be disclosed in the specification. Structures of the species must be submitted and the species identified in the specification. This group may be subject to further restriction.

V. Claim 16, drawn to a process of making compounds of groups I-III classifiable in several non-heterocyclic classes (558, 562, etc.), numerous subclasses.

VI. Claims 18, drawn to a process of making compounds of formula IV classifiable in several non-heterocyclic classes (558, 562, etc.), numerous subclasses.

VII. Claims 19, drawn to a process of making compounds of formula V classifiable in several non-heterocyclic classes (558, 562, etc.), numerous subclasses.

In the instant inventions, the only structural element shared by groups I-VII is carbon and N-C. However, carbon and N-C are not novel. Therefore, under PCT Rules 13.1 and 13.2, carbon and N-C do not constitute a corresponding special technical feature among the groups.

If group V is elected, one of groups I-III must be elected and group V would be examined commensurate in scope therewith.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Rejoinder***

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper

restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the examiner before the patent issues withdraws the restriction requirement. See MPEP § 804.01.
